

EXITFLEX®

Stainless Steel Remote Cup

STAINLESS STEEL – IDEAL FOR WATER BASED MATERIALS

- **Quick release lid clamp, saving time and reducing build up of materials**
- **Carrying handle / hook**
- **Suitable for conventional and HVLP applications**
- **Lid mounted pressure gauge and pressure release valve**
- **Greater manoeuvrability obtained by operative compared with suction / gravity systems.**
- **5BAR (70psi) maximum working pressure**
- **3/8BSP male fluid outlet connection**
- **1/4BSP male air inlet connection**

EPT2.5

The EPT2.5 is a stainless steel pressure vessel and working from a single air supply, is compatible for use with any conventional or HVLP manual spray gun.

With a 2½ litre cup and a maximum working pressure of 5BAR it reduces the need for repetitive cup filling and allows for the spraying of higher viscosity materials.

All fluid passages are stainless steel and are therefore suitable for applying many materials including waterborne materials.

The unique “quick clamp” lid is simple to operate and allows quick access to fill the pot. Eliminating the traditional threaded lid also solves the problems associated with the build up of two pack materials on those threads

Top Quality - Best Results

Before pressurising the vessel ensure that all hoses are connected properly to the correct fitting.

To operate, you will require an airline supply with a 1/4BSP(F) connection to the air inlet. This air supply is regulated into the vessel via the air regulator (4).

The regulated air pressurises the material in the container and “forces” it via the tube out of the 3/8BSP fluid outlet.

The top air connection is the unregulated air supply to the gun.

Reference	Part Number	Description
1	40 002 001 03	¼ BSP Tee Piece
2	50-407	¼ BSP male Quick Release Coupling
3	14 001 001 19	Connector ¼ BSP x ¼ BSP
4	03 003 001 00	Air Regulator ¼ BSP
5	14 002 001 19	Connector ¼ BSP x 3/8 BSP
6	04 070 021 00	Swivel Connector 3/8 BSP
7	40 402 002 28	PTFE lid gasket & ‘O’ Ring kit
8	40 002 003 00	Non Return Valve
9	40 002 004 00	Container 2.5 litre
10	40 002 008 03	Pressure Valve
11	40 002 005 00	Pipe Assembly
12	40 002 028 01	Top Flange
13	40 002 010 28	‘O’ Ring
14	40 002 009 19	Plug
15	13 005 001 00	Pressure Gauge 0-10 bar
16	40 002 030 00	Clamp
17	19 005 029 19	Circlip
18	40 002 029 19	Hook
19	40 002 030 21	Packing
