

## FOR PREPARATION AND MIXING OF LIQUID MATERIALS

The PM 60 pneumatic agitator is perfect for preparation and mixing of most paints in containers of 5 and 10 litre capacity. Some materials, such as lacquer may also be agitated in larger volume containers.

### Standard Features

- Comfortable Handle
- Can be hand-held/flange mounted or on 60-100 stand
- Light Weight
- High Quality Function
- Stainless Steel Shaft & Propeller
- Long Service Life
- Integral Speed Control & silencer

60-200 flange mounting connection also available

### Technical Data

- Air pressure for operation 0.5 to 8 BAR
- Speed @ 4BAR = 900RPM
- Air consumption = 100 L/min
- Output = 60 Watts
- Weight (excluding stand) = 1.10kg
- Shaft length = 440mm
- Propeller Diameter = 70mm

The MRM-050 features a 0.42HP direct drive air motor for greater mixing ability either for heavier materials or in larger quantities up to 25-litre capacity.

### Standard Features

- Comfortable "T" Bar Handle Grip
- Can be hand-held
- Light Weight
- High Quality Function
- Long Service Life
- Integral Speed Control & silencer

### Technical Data

- Operating Air Pressure 0.5 to 5.6BAR
- Speed @ 5.6BAR = 6,000RPM
- Air consumption = 12.5CFM @ 5.6BAR
- Output = 0.33kW
- Weight (excluding stand) = 2.0kg
- Shaft length = 500mm
- Spiral Paddle Diameter = 80mm
