

Fluid Control

Pulsation Chambers

16500-225 Plastic pulsation chamber with gauge, 8 Bar MWP inlet 1/2 BSP

22-001-000-00 Stainless steel wetted pulsation dampener with compressed air controlled diaphragm. Fluid inlet 1 BSP F. Air inlet 3/8 BSPF. Suits pumps with output ref to 35 litres per minute. Complete with check valve and gauge.

22-008-000-00 Stainless steel wetted pulsation dampener with compressed air controlled diaphragm for larger circulating systems. Fluid inlet 1 1/4 BSP F. Air inlet 3/8 BSPF. Suits pumps with output upto 76 litres per minute. Complete with check valve and gauge. MWP 21bar WT35kg

22-007-000-01 Stainless steel pulsation bottle suit low or high pressure (up to 345 Bar) can accept filter. Inlet 1/2 BSP M, outlet 1/2 BSP F (Price excluding filter)
(Price with filter)

20-017-000-01 Low pressure fluid regulator for use with higher output applications 1" inlet and outlet. Stainless steel with easy access to lower valve assembly.
